**TIMELESS DESIGN**

Clean lines and refined materials that turn each piece into a design element for your space.

**CERTIFIED NATURAL WOOD**

Selected European oak wood, carefully treated to ensure durability and long-lasting strength.

**PROFESSIONAL PRECISION**

Continuous adjustment systems and high-end components for smooth and safe training.

**KALMA by Fitness Tech** was created to develop professional Pilates equipment that combines technical precision, structural durability, and functional design. Our mission is to provide machinery designed for studios and training centers that demand safety, performance, and long-term reliability.

Each piece of equipment is designed with a clear philosophy: to support movement with stability, fluidity, and control, respecting the essence of Pilates while delivering a solid and consistent experience for both instructors and end users.

A Cadillac Pilates reformer machine is the central focus, set in a bright room with large windows in the background. The machine's frame is made of polished metal, and it features a dark-colored carriage with a mat. Various straps and pulleys are attached to the frame. To the left, a large green plant is partially visible. In the center background, a smaller potted plant sits on a surface. To the right, another plant is on a small wooden stand. The overall atmosphere is clean and modern.

# Cadillac

The **KALMA Pilates Cadillac** is a complete training station that combines the precision of the Pilates method with an elegant and functional design. It enables a smooth and versatile workout, allowing users to develop strength, flexibility, and body control in a single machine. Its oak wood structure and reinforced metal frame ensure excellent stability, making it suitable for both professional studios and home use.

Designed for full-body training, it helps strengthen the core, improve spinal stability, and enhance shoulder and hip mobility. Suspension exercises activate deep muscles, while horizontal routines support proper alignment and posture. Its stable and balanced design allows fluid, low-impact movements, making it an essential piece for comprehensive training.

# Reformer with Tower

The **KALMA Reformer with Tower** combines the smooth movement of a traditional Reformer with the expanded functionality of a vertical tower, creating a complete Pilates training station within a compact and elegant design. Crafted from natural oak and stainless steel, this machine enables a wide range of exercises while maintaining the stability, control and fluidity that define the Pilates method.

The integrated tower system allows movements across different planes and heights, offering greater versatility for strength, mobility and stretching exercises. With precision rails, calibrated piano-wire springs and microfiber leather upholstery, the KALMA Reformer with Tower ensures a smooth and controlled training experience in every session.

# Ladder Barrel

The **KALMA Ladder Barrel** combines elegance, stability and functionality to deliver a Pilates training experience focused on flexibility, spinal mobility and postural alignment. Crafted from natural oak wood and upholstered with anti-slip microfiber leather, this equipment provides the ideal support for exercises that strengthen the core, improve spinal extension and enhance body control.

Its curved barrel and rear ladder structure allow a wide range of controlled movements while enabling users to adjust intensity and range of motion according to their level. Designed for both professional Pilates studios and refined home training spaces, the Ladder Barrel KALMA offers the durability, stability and comfort required for precise and effective practice.

# Spine Corrector

The **KALMA Spine Corrector** is an essential Pilates tool designed to improve spinal mobility, postural alignment and core strength. Crafted from natural oak wood and finished with high-quality microfiber leather upholstery, it provides an ergonomic surface that naturally follows the curve of the spine. This equipment allows smooth, controlled exercises that help release tension, strengthen the back and support balanced posture.

Compact, elegant and highly functional, the KALMA Spine Corrector supports each movement with precision and stability. Its curved structure enables a wide range of exercises focused on spinal mobility, chest opening and flexibility. Ideal for rehabilitation routines, deep muscle activation and general body wellness, it reflects the perfect balance between technique, comfort and refined design that defines the KALMA collection.

# Wunda Chair

The **KALMA Wunda Chair** represents the perfect combination of strength, control and refined design. Built with a natural oak structure and ergonomic finishes, it allows precise and stable training even in limited spaces. This professional Pilates chair is designed to activate deep muscles, improve posture and develop overall body balance, delivering studio-level performance in a compact and functional format.

Compact yet robust, the KALMA Wunda Chair adapts perfectly to both professional Pilates studios and home training environments. Its calibrated spring system and stable platform enable resistance, balance and coordination exercises with smooth and controlled movement. The clean lines and premium materials reflect the sophisticated aesthetic of the KALMA collection, combining technical performance with natural elegance.
